CAREER OVERVIEW

Detail-oriented frontend developer with strong expertise in HTML5, CSS3, JavaScript, Bootstrap, and responsive web design, focused on building pixel-perfect, user-centric interfaces. Experienced in translating UI/UX designs into high-performance, cross-browser compatible web pages, with a strong eye for design, usability, and clean, maintainable code.

EDUCATION

Bachelor of Engineering in CSE - AI/ML Brainware University, Barasat, West Bengal, 78.62%	2022 - 2026
Class XII Jenkins School, Coochbehar, West Bengal, 87.2%	2019 - 2021
Class X Jenkins School, Coochbehar, West Bengal, 84.7%	2018 - 2019

SKILLS

Programming Languages	Python, JavaScript, TypeScript
Frontend Frameworks	HTML5, CSS3, TailwindCSS, ReactJS
Backend Frameworks	NodeJS, Django, Flask
Database	SQLite, MySQL
Version Control	Git, GitHub

PROJECTS

Tech It Easy - A Blog Website

- Developed a blog platform using Flask, MySQL, and Bootstrap, featuring user authentication with secure sessions.
- Implemented full CRUD functionality for posts with user-specific dashboards and ownership control.
- Designed the site to be lightweight, responsive, and easily deployable on platforms like Render and PythonAnywhere.

Switch - An E Commerce Website

- Developed a full-stack e-commerce platform using Python & Django, enabling a smooth customer journey from browsing to checkout.
- Built a secure authentication system (registration, login, profile management, OTP-based password reset).

BeingBifrons - Personal Portfolio Website

- Built a fully responsive portfolio using HTML5, CSS3, Tailwind & JavaScript to showcase skills and projects.
- Integrated a contact form with EmailJS for direct communication without backend hosting.
- Deployed via GitHub Pages with a custom GoDaddy domain.
